

IntelliRoute[®] is the commercial transportation industry's leading source for truck specific routing, mileages and mapping. Over 91% of Fortune 500 shippers and 94% of the leading freight carriers rely on Rand McNally. Rand McNally is the only commercially available routing and mileage solution that features both industry standard routing types: Household Goods (HHG) and Practical.

Routing & Mileage Standard

IntelliRoute[®] maximizes profit margins when rating and routing shipments with four powerful options:

Customized Configurations

- **Customize routes based on vehicle configuration:** Choose routing for 48-ft. and 53-ft. single, double and triple trailers.
- Route to avoid tolls, Hazmat, road construction and more.
- Save money by controlling where your loads go.
- Route confidently in Canada and Mexico – IntelliRoute[®] contains comprehensive postal codes for Canada and Mexico.

- **Practical Routes** produce the fastest, fuel-efficient, truck-drivable route between two or more locations
- **Household Goods (HHG)** mileages are the shortest, truck-drivable distances between two or more locations, based on Mileage Guide 19
- **Dock2Dock** provides address-to-address routing
- **Lowest Cost** optimizes savings with tolls, fuel efficiency and quickest route

Rand McNally is an industry leader in commercial transportation.

- **IntelliRoute[®] is powered by superior Rand McNally data.** Our truck-specific routing, mileage, and mapping spans more than 6,695,000 miles of U.S. truck attributed roads with 24,300,000 uniquely attributed road segments.
 - **Easily integrates** with more than 82 software providers and TMS systems, thereby leveraging a fleet's current investment in dispatch software
