PostEverywhere™ Partners With Aljex For Time-Saving Load Board Management

Middlesex, N.J. - (date) -- Aljex Software, Inc., providers of profit-driving truckload brokerage solutions, announced they have integrated PostEverywhere freight matching services and load boards with Aljex's freight brokerage software. Integration of Aljex software and PostEverywhere enables customers to save time, reduce unnecessary calls and share critical information with the click of a mouse.

Aljex Software is the industry leading provider of management software for freight brokers, logistics companies and other non-asset-based transportation providers. PostEverywhere enables transportation companies to quickly and easily post loads and trucks to multiple freight-matching sites. Users enter load or truck information once, and send it to as many as 40 freight matching services with a quick point-and-click command. Loads and available trucks can be removed just as easily when booked.

Integration with PostEverywhere enables Aljex customers to post to multiple websites automatically within the Aljex solution they use to manage business day to day. Loads already entered into the Aljex system can be posted without reentering information. PostEverywhere can also be accessed through Aljex's exclusive SmartSearch®, a revolutionary system that can automatically tender loads to pre-approved carriers and remove those loads from freight matching services when booked.

“Using PostEverywhere within Aljex costs less than the labor of manually posting 25 loads a day to just 2 websites,” said Aljex President Tom Heine. “Aljex customers can increase volume without increasing staff.

“At Aljex Software we continually strive to make our customers’ lives easier and more profitable by facilitating their business processes,” he said.

Aljex’s scalable solutions include Aljex Ultra, a web-based TMS system with SmartSearch, an innovative load matching and tendering system. Aljex customers include the brokerage operations of FedEx, Trinity Transport and Dart Advantage, among many others.

About PostEverywhere™

PostEverywhere™ is a load posting and truck posting service for shippers, freight brokers, and carriers -- enter loads or trucks once, then send them to multiple Internet posting sites. PostEverywhere puts you in control when using Internet posting sites and online freight matching companies. For more information, visit www.posteverywhere.com.

About Aljex Software Inc.
