

ALJEX INTEGRATES RAND McNALLY MILEAGE, ROUTING

By *CCJ STAFF*
 Published November, 10 2010

Rand McNally's mileage and routing applications, MileMaker and IntelliRoute, have been integrated with Aljex's hosted transportation management software for brokers, carriers, and 3PLs.

Aljex says its customers can quickly and easily generate accurate Rand McNally mileage and truck-specific routes without leaving their working Aljex application. MileMaker distances will automatically populate the appropriate fields in Aljex screens and documents. There is no need to re-enter mileage data, which saves time and eliminates copying errors.

MileMaker offers accurate distances for rating, routing, and billing and IntelliRoute provides efficient, truck-sensitive routing.
