

API Available Truck Specs

File name requirements:

All lowercase and alphanumeric

1. No special characters
2. .ade file extension
3. File names must be unique
4. File names must start with the first 5 characters "gowho"
5. Example file name: gowho0206141130.ade

See specifications below for file mapping.

See below for an example file. (it's tab delimited, one record per line per transaction, no carriage return, no line feed)

Sample command to send it to Aljex:

http://company.aljex.com/cgi-bin/aljexapi?thx1138+Tk7823Mx92xeitppaP+gowho+api_avail_trk_in

Company.aljex.com will be provided by Aljex. After the thx1138+ and before the +gowho is an example of an encrypted system identifier. We will provide that code when the system is setup.

SUBMIT RECORD: File mapping specifications (elements highlighted in green are required, yellow are conditional):

NOTE: The API username and password will be provided by Aljex.
