

Revised 7/12/18

File name requirements:

1. All lowercase and alphanumeric
2. No special characters
3. .ade file extension
4. File names must be unique
5. File names must start with the first 7 characters "triphed"
6. Example file name: triphed0206141130.ade

See specifications below for file mapping.

See below for an example file. (it's tab delimited, one record per line per transaction, no carriage return, no line feed)

Sample command to send it to aljex:

[http://company.aljex.com/cgi-bin/aljexapi?thx1138+Tk7823Mx92xeitppaP+triphed+api\\_214\\_in](http://company.aljex.com/cgi-bin/aljexapi?thx1138+Tk7823Mx92xeitppaP+triphed+api_214_in)

Company.aljex.com will be provided by Aljex. After the thx1138+ and before the +triphed is an example of an encrypted system identifier. We will provide that code when the system is setup.

**SUBMIT RECORD: File mapping specifications (elements highlighted in green are required, yellow are conditional):**

**NOTE: The API username and password will be provided by Aljex.**

Field Number/Name	Length	Format	Notes
1 Username	15		API username
2 Password	15		API password
3 Reserved			
4 Reserved			
5 Reserved			
6 Reserved			
7 Reserved			
8 Reserved			
9 Reserved			
10 Reserved			
11 Pro #	7		
12 Record #	8		Required for Action E and D (Field 38)
13 Date	8	MM/DD/YY	Check call date
14 r			
15 Text	50		General comment
16 Date	8	MM/DD/YY
