

Electronic Data Interchange (Aljex EDI)

Aljex EDI module is a fully integrated suite of applications that allows for the timely and seamless exchange of important documents and information electronically with our customers. From bills of lading and load tenders to shipment status and invoicing, each document type is customized to fit the requirements of each trading partner. We are not restricted to certain Value Added Networks or communications protocols and every transaction is encrypted to ensure that each communication is secure.

Aljex's current EDI transaction sets include:

- ***204 – Load Tender***
- ***210 – Electronic Invoicing***
- ***211 – Bill of Lading***
- ***214 – Shipment Status***
- ***990 – Load Response***
- ***997 – Acknowledgment***
- ***Positive Pay (banking)***
- ***Aljex-Aljex EDI***
- ***Load Board Posting***

In addition to the more traditional ANSI X12 standards, Aljex also utilizes CSV via FTP and newer XML formats.
