

TEXT MESSAGING FEATURE

Text messaging is live within Aljex and the feature allows messaging directly from Aljex. From Active Dispatch you can text a request for the driver to call and a limited rate confirmation with no rates. From the Carrier Advance file you can text the advance check and amount.

The phone # to text is pulled from screen 0 in Active Dispatch. A preview screen allows you to edit the text or the phone #.

To sign up for this feature, please sign below and fax or email the authorization to Aljex Support. There is a charge of 10 cents per submitted text, with a minimum charge of \$5 per month. Texting is outbound only: the recipient cannot reply to the text message.

I have read the agreement above and understand the costs associated with using the Text Messaging Feature in Aljex Software.
