Aljex Suggested System Requirements

- **Printers**. Your printer must be able to read PCL5 in hardware/firmware. PCL is the standard print format for HP LaserJet-compatible printers. Most, but not all laser printers can read PCL 5 or lower, but double check with your vendor.
- **Scanners**. To scan directly into Aljex your scanner must be connected to your desktop computer, it cannot be a network scanner. If you are using a network scanner you will need to save the files to your desktop and upload the document/s. A scanner with Twain drivers is required to scan directly into Aljex. The scanner must have a feeder and cannot be flatbed only. In order To scan directly into Aljex, you must first be able to scan in Windows.
- **Web Browser**. As Aljex continues to evolve, new coding is required to accomplish many of the features available through our software. To ensure all features function as designed, users must use a JavaScript enabled modern browser such as Mozilla Firefox or Google Chrome. Internet Explorer 9 or higher is also supported when Compatibility View is OFF. With Microsoft phasing out Windows XP, IE8 does not support all modern code being used and will not display all Aljex programs properly.
- **Monitor Size**. Aljex Vision is designed to fit a 22-inch widescreen monitor (or larger) at a minimum resolution of 1680 x 1050.
- **MAC/ Apple OS**. To use Aljex Classic on a MAC/Apple OS: Run VMware Fusion, Parallels Desktop for Mac or Apple Boot camp, so you can install FacetWin on the computer. If you run VMWare Fusion or Parallels Desktop, you will NEED to install Windows, and then install FacetWin. If you run Apple Boot Camp, boot into Windows and then install FacetWin on the computer.
- **Checks**. Dynamic Systems has been working with Aljex Software to provide Aljex users professionally designed and 100% compatible checks and forms. To enhance your web experience, they have built a website specifically for Aljex Software users. You can track your orders, review previous orders and create your own proofs! Please use this link to access: http://www.dswebtoprint.com/aljex
- **Invoices**
  - Invoices are designed to be folded into thirds.
  - The Bill To is located in the bottom left corner & designed to show in window (only one window).
  - Aljex uses Number 10 Window Envelopes for Invoices
