1.0 Introduction

The Aljex Transportation Exchange, or ATEX, allows Vision users to list available loads. This functionality is similar to other online load boards. When Vision users create a load, they can post them to ATEX by checking the 'Post to Loadboards' checkbox. Registered carriers can then see those ATEX loads and match them with their own trucks.

3.2 Accessing the Load Board

Vision users will post loads and or spot loads to the loadboards with a pickup date in the future or the current date.

Carriers will need to be registered within ATEX. Once registered, carriers will login and be able to see available loads to bid on. Loads can be filtered/searchable via equipment type, dates, origin and/or destination state.
