

## In-Transit Notifications

### Email Check Call Information up to Every Hour

The In-Transit Notifications field on the Vision Check Calls screen is for Check Call update emails to the specified addresses. The field is 75 characters long and may hold multiple email addresses separated by a comma (email1@mail.com,email2@mail.com). To stop notifications remove all addresses from the field

Map

- Every hour will send every hour
- Every 2 hours will send on even hours (10, 12, 14, 16, ...)
- Every 4 hours will send every other even hours (12, 16, 20,...)
- Every 6 hours will send at 0, 6, 12, 18.

If the option has All Check calls, all check calls for the pro will be included on every email  
 If the option has Today's Check Calls, all check calls with the current date will be included on every email  
 If the option has New Check Calls, check calls added since the last interval (every, every 2, every 4, or every 6 hours) will be included on the email.

When there are unsaved changes (either the address field or the frequency option) the Save Notifications text will be red.
